Safety Instructions:

- Store water-polluting substances safely in accordance with GHS 1-4 and take appropriate measures to prevent leaks.
- Regular inspection and logging required due to the material's sensitivity to corrosion.
- When storing flammable liquids of GHS 1-3, the use of earthing/potential equalisation is required.
- Only trained and authorised personnel may carry out final assembly and handling of hazardous substances.
- Ensure suitable safety equipment and ventilation, especially when used outdoors.
- During storage, safe use and suitable partitioning of access to protect against unauthorised access must be ensured.
- Regular safety checks of the storage equipment and check the condition of the drip tray for leaks and functionality.
- Use a drip tray to properly collect any leaking liquids.
- Ensure that earthing and potential equalisation are used for outdoor storage.
- Only use in accordance with the instructions for use for the intended applications and read the safety instructions carefully.
- Prevent unauthorised persons from accessing hazardous substances.
