Safety Instructions:

- Ensure danger of suffocation due to improper storage of hazardous substances, use suitable protective equipment.
- Check the drip tray regularly for leaks or cracks and document them.
- Ground/equalise shelf containers properly, especially when storing flammable liquids of GHS 1-3.
- Use appropriately trained personnel for assembly, use and handling with lifting equipment such as pallet trucks or forklift trucks.
- Ensure appropriate personal protective equipment and protective measures when handling hazardous substances.
- Carry out regular inspections and maintenance for structure, corrosion and ventilation systems.
- Ensure safety measures for the storage and handling of water-polluting substances of GHS 1-4.
- Protect the product from the weather and use only in accordance with the specifications and manufacturer's instructions.
- Access to the container with a secured double-wing gate and only by authorised personnel.
- Ensure potential equalisation/earthing when storing flammable liquids outdoors, use lighting if necessary to prevent gas accumulation.
- Before using the product, check for damage and document corrosion protection measures.
- Apply suitable labelling and marking to the stored hazardous substances.
