Article Numbers: 461104, 461103, 461102, 461101, 461100, 461099, 461056, 461055, 461054, 461053, 461052, 461051

Safety Instructions:

- Take care when handling water-polluting substances of GHS 1-4.
- Only use with materials that are compatible with the shelving container.
- Check the drip tray regularly for damage and empty it to prevent overflows and environmental damage.
- For outdoor use, ensure that the material is weatherproof and properly earthed, especially for flammable liquids of GHS 1-3.
- Installation and transport may only be carried out by authorised specialist companies or trained personnel in compliance with the safety regulations.
- Only move shelf containers with suitable equipment such as pallet trucks or forklift trucks and observe the operating instructions.
- When storing flammable liquids, earthing/potential equalisation is required to minimise the risk of ignition.
- Regular inspection and logging of the container for corrosion and damage, especially sharp edges.
- In the event of a leak, safely collect any escaping liquid and take safety measures.
- Ensure that there is proper ventilation to prevent the accumulation of hazardous vapours.
- Position the shelving container on a stable and level surface to prevent it from tipping over.
- Ensure ventilation to avoid the risk of suffocation.
- Provide safety data sheets for stored substances and train employees in safe handling.
- In the event of safety problems, notify the relevant authorities immediately.
