Please note the technical data of the products!

Article Numbers: 461140, 461139, 461138, 461137, 461136, 461135

Safety Instructions:

- Check the drip tray regularly for leaks and ensure that it is not cracked or damaged.
- Ensure that the racking container is properly earthed, especially when storing flammable liquids of GHS 1-3, and use technical ventilation.
- Only store water-polluting substances of GHS 1-4 and use drip pans to avoid environmental risks.
- Ensure that the material is flame-retardant (class B-s1 d0 in accordance with DIN EN 13501-1), but still take safety precautions.
- Carry out regular maintenance and inspection of the double swing gate to ensure safety precautions.
- Do not overload the container and observe the maximum load capacity.
- If used outdoors, ensure that the container is protected against moisture and extreme temperature fluctuations and ensure technical ventilation if installed.
- Observe protective measures against contact with hazardous substances and use suitable personal protective equipment.
- Careful handling with forklift trucks or pallet trucks requires caution.
- Not suitable for the storage of food or other unauthorised substances.
- Improper handling may result in the release of hazardous substances and a risk of suffocation and electric shock.
- Check and record the corrosion sensitivity regularly.
