Article Numbers: 461170, 461169, 461168, 461167, 461166, 461165

Safety Instructions:

- Regular inspections and mandatory logging due to the material's sensitivity to corrosion. Carry out regular maintenance and safety inspections to ensure the safety of the racking container.
- Only suitable for outdoor storage of flammable liquids of GHS 1-3 under certain conditions; additional safety precautions are required. Ensure technical ventilation and earthing/potential equalisation.
- Observe safe storage of substances hazardous to water in accordance with GHS 1-4. Use suitable protective measures and PPE.
- Check the drip tray regularly for leaks and functionality to prevent environmental damage due to liquid leakage.
- Ensure that the racking container is properly ventilated, especially when handling flammable liquids.
- Only to be used by authorised and trained persons. Observe all safety and operating instructions and affix them clearly visible.
- Wear PPE and take safety precautions when handling hazardous substances.
- Pay attention to electrical components and correct handling of the sliding doors and the closing mechanism to avoid injury.
- Correct use of the crane eyes in accordance with the safety regulations.
- Insulation of the container ensures protection against temperature shocks.
