Safety Instructions:

- Safely store water-polluting substances of GHS 1-4 and only store these.
- Use the necessary safety equipment when handling hazardous substances and observe proper handling.
- Carry out regular inspections for leaks and structural integrity and document corrosion.
- Restrict access to hazardous areas to authorised persons and use qualified personnel for loading and unloading.
- Use the drip tray in accordance with legal requirements, check regularly for cleanliness, functionality and damage.
- Always lock the sliding gate securely when it is not in use.
- Observe installations for earthing and technical ventilation when storing flammable liquids of GHS 1-3.
- Only use containers in suitable and securely anchored locations to prevent them from tipping over.
- Be aware of the risk of slipping on wet surfaces and the risk of suffocation due to collapse if loaded incorrectly.
- Clearly label warning notices for consumers and make forklift and pallet truck use safe when storing flammable substances.
- Do not use in closed rooms if flammable substances are stored.
