Safety Instructions:

- Flammable liquids may only be stored in accordance with local regulations.
- Regularly check the integrity of the drip tray to prevent leaks.
- Wear protective clothing such as gloves and safety goggles when working with hazardous substances.
- Ensure that the drip tray is stable and cannot tip over when a forklift or pallet truck is used.
- Sump tray should only be used for the storage of flammable liquids of GHS category 1-3.
- Regular checks and logging obligations are required to monitor the corrosion of the material.
- The drip tray must be used safely and in accordance with the requirements set out in the regulations.
- Protect the drip tray from physical damage caused by improper handling, e.g. when using pallet trucks or forklift trucks.
- Appropriate personal protective equipment (PPE) should be worn when transferring or emptying hazardous substances.
