Article Numbers: 139460, 139459, 139458

Safety Instructions:

- When storing and refuelling diesel and RME, take appropriate safety precautions and observe the safety regulations for water protection areas in order to avoid environmental damage.
- Check the hose and connecting parts regularly for leaks and damage in order to minimise leaks and the associated environmental risks.
- Use appropriate personal protective equipment (PPE), such as gloves and goggles, when handling to avoid skin and respiratory contact with propellants.
- Operate the tank system in accordance with the local regulations for the storage of hazardous substances and ensure that hazards are labelled in accordance with the applicable regulations.
- The tank system should not be installed in the immediate vicinity of bodies of water or sensitive ecosystems in order to avoid environmental damage.
- The system may only be used by trained personnel in order to prevent accidents and misuse.
- Avoid risk of suffocation due to improper handling of small parts.
- Take into account the risk of fire if diesel fuel is stored improperly.
- Provide safety information on handling hazardous liquids.
- Be aware of the risk of ignition due to stored liquids (diesel, RME).
