Safety Instructions:

- Use security cylinder locks to prevent unauthorised access and ensure that they are correctly locked.
- Do not overload lockers and check their functionality regularly to avoid mechanical damage.
- Use protective clothing and equipment during transport and assembly; the product is heavy (67 kg) and appropriate lifting aids should be used.
- Ensure installation in accordance with the enclosed instructions and technical documentation to guarantee stability and safety.
- Do not block the ventilation holes to ensure air circulation.
- Keep small parts away from children to avoid the risk of choking.
- Improper handling of steel or metal parts can cause injuries; take suitable measures for handling sharp edges.
- Lockers must be locked securely; ensure that the locks are not damaged by improper use.
- Use product for indoor use only.
- The product is supplied disassembled; suitable aids should be used for assembly.
- Place locker wardrobes stably and on a level surface to prevent them from tipping over.
- Keep an eye on swing doors to avoid injuries when closing them.
- Do not use lockers for flammable or dangerous objects.
- During assembly, make sure that all parts are firmly seated and that there are no loose parts.
- Review and affix required warnings and instructions for safe use to prevent misuse.
- Take immediate corrective action in the event of anomalies or safety risks.
- Design products in such a way that they do not pose a danger to children.
