Safety Instructions:

- Ensure that the ladder is used on a stable and level surface.
- Before use, check that all connections and mechanisms are functional and intact and check for damage.
- Do not overload the ladder, observe the permissible weight and avoid overloading the specified load limits.
- Do not use the ladder in slippery, windy or bad weather conditions.
- Ensure that the ladder is not used as a scaffold, platform or workstation and is always set up in an upright position.
- Always pay attention to the fall protection during use.
- Deny children access to the ladder and the area under the ladder.
- Ensure that all safety instructions and notes in the operating instructions are observed.
- Avoid the risk of accidents due to improper use.
- Check the AutoSnap safety mechanisms before use.
- Protect the ladder from the weather during maintenance and storage.
- Always stand on the rungs and steps and adopt a secure stance.
