### Safety Instructions:

- The waste oil tank may only be operated by trained personnel.
- Avoid direct contact with skin, eyes and clothing to prevent chemical irritation; use personal protective equipment such as gloves and safety goggles.
- Store the tank in a well-ventilated place to prevent the accumulation of vapours.
- Regularly check the visual leakage indicator for functionality and possible leaks.
- Ensure that the electrical connection complies with safety standards to avoid the risk of electric shock and carry out correct installation and regular maintenance of the electric pump and electrical equipment.
- Keep the tank out of the reach of children.
- Follow all applicable safety regulations for the handling and disposal of used oil in accordance with local regulations for hazardous substances.
- The waste oil tank is only to be used for the intended indoor use as a collection container for waste oil.
- The waste oil tank must be installed and operated in accordance with the local regulations for the storage of hazardous substances.
- Store and transport safely; protect containers against damage.
- Always close the vent cap tightly to prevent leaks.
- In the event of a leak, take immediate measures to contain it and check the container.
