Article Numbers: 460646, 460645, 460644

Safety Instructions:

- Always wear suitable protective equipment, including a helmet and safety shoes.
- Ensure that the load is correctly secured and that the drum lifter dolly is not overloaded beyond the maximum permissible load of 220 litres.
- Keep the work area free of obstacles to prevent falls and injuries.
- Regularly check the mechanical parts and the tilting mechanism for wear or damage before use.
- Safe handling of hazardous substances in accordance with the relevant regulations.
- If used incorrectly, there is a risk of physical injury due to mechanical hazards.
- Read and observe the operating instructions before use; the product may only be used by trained personnel.
- Only use the appliance as intended and secure the drum carefully with the lashing strap during the lifting process.
- Avoid contact with moving parts during the tilting process and protect your hands from possible crushing.
- The minimum age for operation is 18 years.
- Use personal protective equipment such as gloves and safety shoes.
