Please note the technical data of the products!

Article Numbers: 139870, 139869, 139868, 139867

Safety Instructions:

- Not suitable for operation in potentially explosive atmospheres.
- Carefully read and observe the operating instructions before commissioning.
- Always ensure that your hands are dry when handling electrically powered appliances.
- Ensure that the electric pump is properly earthed to avoid the risk of electric shock.
- Switch off the appliance immediately in the event of overheating, overloading or unusual noises.
- Do not operate in closed rooms without adequate ventilation.
- Keep children and pets away from the appliance.
- Only use in dry environments and do not immerse in water.
- Electrical connection work should only be carried out by qualified specialists.
- Ambient temperatures not below 0°C or above 40°C.
- Avoid overpressurisation and check the pressure relief valve regularly.
- Caution: Electrical current! Protect from dangerous contact with water.
- The pump is intended for use with diesel and biodiesel. Ensure that no other liquids are used.
- The pump has a thermal overload protection. Caution in case of overload.
- Only use the pump within the intended temperature range to avoid overheating.
- Wear the required personal protective equipment, in particular gloves and safety goggles, during installation and use.
- During installation, check that the electrical connections are watertight to avoid short circuits.
- The appliance is not suitable for outdoor use without protective devices.
- The appliance may only be operated by persons who are familiar with the operating instructions.
- Do not use the pump for hazardous liquids or in connection with flammable substances without suitable safety measures.
- Keep the work area free of obstacles to avoid accidents.
- In the event of power failures or technical problems, disconnect the appliance from the mains immediately.
