Safety Instructions:

- Maximum load: 110 kg. Avoid overloading the chair to prevent damage or failure of the structure.
- Take care not to place the chair near sources of heat or damp places to avoid damaging the material.
- Avoid sitting on the back of the chair or standing/jumping on the chair to prevent injury and damage.
- Make sure that the height adjustment and backrest are correctly adjusted to avoid back pain or other health problems.
- Regularly check the stability and safety of the armrests, castors and for damage in order to minimise potential hazards.
- Keep the chair clean and use suitable cleaning agents to prevent damage.
- Use only on stable, non-slip floors. Safety double castors are only suitable for carpeted floors.
- Avoid prolonged sitting without movement. Do not sit for more than 8 hours at a time.
- Consult the manufacturer for modifications or repairs.
- Users should follow all instructions for installation and use.
- Ensure that instructions and safety information are provided in a comprehensible manner.
- Regular checks for improper use are required.
