Safety Instructions:

- Only to be used by trained personnel.
- Check before use and regularly for damage.
- Ensure that the drum lifter is used on a resistant, stable and level surface.
- Do not overload and never exceed the recommended load capacity.
- Wear suitable protective equipment such as gloves and safety shoes during operation.
- Do not exceed the maximum lifting range of 1170 mm.
- Users must read and understand the operating instructions and they must be easily accessible at all times.
- Ensure that the product is correctly installed before use.
- Ensure stable and secure positioning during operation.
- Only use the product in a moderate temperature range to avoid material deformation.
- Ensure that no persons are standing under or near the raised drum.
