Safety Instructions:

- Ensure safe handling when installing and using the rail system.
- Attach intermediate brackets securely at the recommended distance of approx. 1 m to prevent slipping.
- Install end stops correctly to prevent the ladder from slipping.
- Only use the rail system with compatible ladder rails.
- Regular inspection of the rail system for wear or damage.
- Attach the rail system securely to the wall to prevent it from tipping over or slipping.
- Only use the ladder with sufficient support or fastening on the rail system.
- The rail system should be used under adult supervision, especially by children.
- Use only for the intended purpose; improper use can be dangerous.
- Before use, ensure that all parts are correctly fitted.
- Observe the maximum load capacity of the shelf ladder and rail system.
- Avoid risk of suffocation due to improper handling or inadequate installation of the rail system.
- Avoid the risk of falling if the shelf ladder is used improperly or installed incorrectly.
- Do not move the ladder beyond the end stops to prevent falls.
- Observe the installation instructions, in particular the distance of 1 m between the intermediate brackets.
- Do not overload the bracket to avoid structural damage and accidents.
