

Product Safety Information

Hazardous material depot type GD-A BAUER, steel, for indoor use, 220 l collection volume, various designs

Please note the technical data of the products!

Article Numbers: 460838, 460837, 460836, 460835, 460834, 460833

Safety Instructions:

- Store flammable liquids of categories GHS 1-3 and water-polluting substances of categories GHS 1-4 safely in accordance with the regulations.
- Secure the hazardous materials depot with the supplied safety chain and keep it out of the reach of children and unauthorised persons.
- Always transport containers with a pallet truck or forklift and ensure correct handling to avoid injury.
- Use the drip tray with a volume of 220 litres properly to prevent leaks.
- Carry out regular inspections for corrosion, leaks and general integrity of the steel material and the drip tray.
- Ensure that the depot is installed correctly and placed on a stable, level surface.
- Protect the depot from direct sunlight, heat sources and extreme temperatures to ensure material integrity.
- Avoid overfilling to prevent overflows and ensure that the depot is properly closed to prevent leaks.
- Only use the depot indoors, with a splash guard if necessary.
- If the depot is damaged, contact the manufacturer immediately and report any leaks to the relevant authorities.
- Wear suitable protective equipment such as gloves and protective clothing when handling hazardous substances.
- Dispose of hazardous substances in compliance with the relevant legal regulations.
