Safety Instructions:

- Seat height must be adjusted to body height to ensure comfort and ergonomics.
- Take regular breaks to avoid muscle tension and back pain; maximum sitting time 8 hours per day.
- Adjust the backrest ergonomically, adjust the armrests so that the shoulders are relaxed and adjust the spring force of the synchronised mechanism correctly.
- Check the chair regularly for damage and functionality to ensure safety.
- Use soft castors for carpeted floors; harder castors recommended for medium/high pile carpets to ensure stability.
- Chair suitable for users weighing up to 110 kg.
- Not to be used by children under 14 years of age; avoid risk of injury.
- Only use safety double castors on carpeted floors to avoid damage.
- Do not sit or lean on armrests to prevent damage.
