### Safety Instructions:

- The changing bench is designed for damp rooms and should be protected from direct moisture; regular corrosion testing is recommended.
- Adjustable floor glides should be correctly adjusted and regularly checked for safety to avoid instability.
- Benches must not be loaded beyond their maximum load capacity (max. 100 kg) and must be checked regularly for stability.
- The bench is built without a backrest - caution is advised to avoid falls.
- Not suitable for children under the age of 14 due to the risk of falling and choking on small parts.
- Avoid direct sunlight and aggressive cleaning agents to prevent material changes.
- Ensure that the bench is standing on a stable, level surface to prevent it from tipping over.
- Use in damp rooms harbours a risk of slipping; suitable floor coverings should be used.
- Not suitable for outdoor use without suitable protective measures and not suitable for use in dry rooms.
