Article Numbers: 461528, 461527, 461526, 461525

Safety Instructions:

- Carry out regular checks and logging of the racking system for corrosion sensitivity and stability.
- Check drip pans regularly for possible leaks and damage.
- Only store authorised, pollutant-free materials; only fill shelves with authorised hazardous substances.
- Provide safety information and instructions in a comprehensible form, ensure that operating instructions are available.
- Wear suitable protective equipment when handling hazardous substances and train employees in the safe handling of hazardous and water-polluting substances.
- Ensure correct handling of water-polluting liquids of GHS categories 1-4.
- Do not place the shelf in direct sunlight or humid environments, make sure that it is stable and cannot tip over.
- In the event of accidents, take immediate measures to avert danger; in the event of leaks, take appropriate emergency measures.
- Observe the maximum load capacity of the shelves.
- Keep the shelf away from children.
- Read the instructions for use before use.
- The presentation of the product should make it clear that it is a hazardous goods shelf.
