Safety Instructions:

- When storing heavy items, ensure that the weight is evenly distributed on the shelves.
- Secure the cabinet with suitable wall anchors to prevent it from tipping over.
- Avoid contact with water or moisture to prevent rust on the metal parts.
- Please note the maximum total load capacity of the cupboard of 320 kg.
- Keep the cabinet clean and free of overhanging cables or decorations to avoid tripping hazards.
- Please always place the product on a stable surface to prevent it from tipping over.
- Do not exceed the maximum permissible load capacity of 320 kg.
- Use the security lock to prevent unauthorised access.
- To avoid injury, do not allow children access to the product.
- Check the cabinet regularly for mechanical stability and functionality.
