Safety Instructions:

- Risk of suffocation due to improper handling of small parts or cables.
- Risk of electric shock if the charging cabinet and its electrical components are used or connected incorrectly.
- Ensure that the loading cabinet is standing on a stable surface to prevent it from tipping over.
- The charging cabinet should be positioned out of the reach of children and should only be used under adult supervision to prevent misuse.
- Do not use near water sources or damp areas to avoid the risk of short circuits.
- Regularly check the electrical connections and cables for damage.
- Avoid overheating by ensuring that the inside of the enclosure is ventilated.
- Follow the manufacturer's instructions for safe use and maintenance.
- Make sure that no foreign objects get into the compartments to avoid short circuits.
- Only place devices in the charging cabinet if they are suitable for charging.
- Observe the maximum capacity to avoid overcharging and the risk of fire.
- Only use chargers and cables from certified manufacturers.
- Before use, ensure that all doors of the charging cabinet are properly closed.
- Access to the charging cabinet should only be permitted to authorised persons.
- Read the operating instructions carefully before using the product.
- Ensure that integrated connections are only used by authorised personnel.
