Article Numbers: 461718, 461717, 461716, 461715, 461714, 461713, 461712

Safety Instructions:

- Take care when storing aggressive chemicals and flammable liquids.
- Only use the cabinet for the intended substances and materials and operate it in accordance with the manufacturer's instructions.
- Indoor use only - Designed for indoor use, not for outdoor use.
- Lock the doors of the cabinet securely to prevent unauthorised access; ensure that the cabinet is properly locked before use.
- Check and maintain the exhaust air system regularly to ensure a constant air exchange rate and to guarantee safe operation.
- The cabinet must be stably positioned and protected against tipping over.
- Avoid activities that generate heat or sparks in the vicinity of the cabinet. Observe the fire resistance (F90), but protect from direct flames.
- Risk of suffocation due to toxic substances; fire hazard due to storage of flammable liquids; health hazard due to aggressive chemicals.
- Store toxic and aggressive chemicals in closed and labelled containers. Before storing hazardous substances, ensure that they are properly identified and labelled.
- Do not overfill so as not to exceed the load on the tray shelves and observe the weight limit for tray shelves and perforated plate insert to prevent structural damage.
- Only use the cabinet in accordance with the applicable regulations and recommendations for the storage of hazardous substances.
- Avoid storing incompatible chemicals together.
- Wear suitable personal protective equipment when handling stored substances.
- Safety instructions: For indoor use only; provide safety information in the language of the user.
- In the event of an accident, take immediate safety measures and inform the relevant authorities.
- Ensure regular maintenance of the ventilation system.
- To ensure that the inside of the cabinet is protected against unauthorised access, use the profile cylinder lock.
- Ensure that clear safety instructions and instructions for use are observed and required. Store and transport appropriately to avoid damage.
- Observe protective measures against chemical and physical risks during use.
- Do not bring into contact with food or animals; safety yellow indicates potential hazards.
