Safety Instructions:

- Only use the cabinet indoors.
- Store toxic substances and aggressive chemicals in accordance with regulations.
- Observe the automatic door closing mechanism to avoid the risk of crushing and to ensure safe closing.
- Operate hinged doors carefully, open with one hand only with caution.
- Install and correctly use the exhaust air system for explosion protection and minimisation of chemical vapours.
- Lift trucks or forklift trucks may only be used properly by qualified personnel.
- Read and follow the safety information carefully and ensure regular inspections.
- Observe fire resistance in accordance with F90 requirements and fire hazard.
- Make the cabinet inaccessible to children and protect against unauthorised access by means of a locking status indicator.
- Avoid direct sunlight to prevent overheating.
- Attach warnings about the potential hazards of chemicals.
- Ensure proper storage of hazardous substances.
- Ensure correct use of the ventilation system and regular maintenance.
- Use the floor drip tray for liquids, do not overload the cupboard (max. load capacity 75 kg per shelf).
- Observe the visual and acoustic warning signal after 60 seconds.
- In the event of fire or smoke, close immediately and secure the surrounding area.
