Please note the technical data of the products!

Article Numbers: 462306, 462305, 462304, 462303

Safety Instructions:

- Observe the applicable legal regulations for the safe storage of toxic substances and aggressive chemicals. For indoor use only, the room must comply with fire protection regulations.
- Risk of suffocation due to improper handling or storage of small parts and chemicals.
- Avoid contact with flammable liquids of GHS categories 1-3 to minimise fire risks. Observe suitable storage regulations for flammable liquids.
- Ensure that the cabinet is not overloaded and that the maximum load capacity is observed.
- The cabinet must be connected to a technical exhaust air system. Ensure access to a suitable exhaust air system to avoid the risk of explosion and poisoning.
- Use a lock or profile cylinder lock to prevent unauthorised access to the contents of the cupboard.
- Regularly check the exhaust air connections and the air exchange to ensure that they are functioning properly.
- Only use the cabinet for its intended purpose in accordance with the operating instructions.
- Use appropriate personal protective equipment for safe handling of toxic or aggressive chemicals.
- Safe operating instructions urgently required.
- Danger of chemical reactions if used improperly.
