Safety Instructions:

- Use cabinet indoors only. Suitable for the storage of hazardous substances and toxic substances in accordance with instructions.
- Ensure that the cabinet is properly ventilated to prevent accumulation of hazardous vapours. Exhaust air connection must be used properly to prevent chemical exposure.
- Hinged doors are equipped with a door hold-open device that must function properly to ensure safe opening and avoid the risk of injury.
- Observe fire resistance F90; be careful when handling flammable liquids of GHS category 1-3. Only store these in suitable quantities.
- Observe the safety data sheets for stored chemicals and check the cabinet regularly for leaks and wear.
- Always close the door and use a lock to prevent unauthorised access.
- Keep the key system under control to prevent unauthorised access.
- Chemicals may be harmful to health; use suitable protective equipment.
- Follow the specific instructions for the disposal of hazardous materials in accordance with local regulations.
- Be aware of the risk of fire or explosion due to flammable liquids; read and follow the operating instructions carefully.
- Regular inspection of the shelves and drip tray for wear or damage.
