Article Numbers: 462378, 462377, 462376, 462375

Safety Instructions:

- Risk of suffocation due to improper storage of toxic substances.
- The cabinet must be secured with a suitable profile cylinder lock to prevent unauthorised access.
- Ensure that the cabinet is well ventilated when storing flammable liquids.
- Regularly check the condition of the exhaust air system to ensure effective air exchange and minimise the risk of explosion by using technical exhaust air systems.
- Use the safety storage cabinet in accordance with the manufacturer's safety instructions and spot checks.
- Warning: Only use the safety storage cabinet for the storage of toxic and hazardous chemicals.
- The door hold-open system may fail if operated incorrectly.
- Carry out regular inspections of the integrity of the doors and locks.
- Attention: Observe the safety instructions on the chemical packaging and wear suitable protective equipment.
- Note the fire resistance of the cabinet, which is F90 fire-resistant.
- Ensure safe handling of toxic and aggressive chemicals.
- Take particular care when storing flammable liquids of GHS categories 1-3.
- Only store water-polluting substances of GHS 1-4 in compliance with the safety precautions.
- The cabinet is designed exclusively for indoor use and must not be used outdoors.
- Always keep hinged doors closed to prevent damage and accidents.
- Consider additional safety equipment such as alarm and monitoring systems.
- Grant access only to authorised persons and check the storage location regularly for safety regulations.
