Please note the technical data of the products!

Article Numbers: 462398, 462397, 462396, 462395, 462394, 462393, 462392, 462391

Safety Instructions:

- Only use the cabinet indoors.
- Secure the cabinet with the profile cylinder lock to prevent unauthorised access.
- Regularly check the function of the door hold-open device and use it when the door is closed to prevent unintentional opening.
- Only store toxic substances, hazardous chemicals and flammable liquids in authorised compartments and in accordance with GHS category classifications.
- Ensure that the exhaust air connection is not blocked and regularly check the ventilation system to ensure proper ventilation and avoid explosion hazards.
- Note the load capacity of the shelves (75 kg) and the drip tray (22 litres).
- The cabinet is fire-resistant (F90), but flammable materials must always be stored under supervision.
- Protect the product from direct sunlight and moisture to prevent material damage.
- Only trained personnel may use the cabinet in suitable premises. Read the user manual carefully before commissioning.
- Carry out regular inspections and maintenance to ensure safety.
- Wear suitable protective equipment and take appropriate safety precautions when handling chemicals.
- If the cabinet is damaged, take it out of operation immediately and contact the manufacturer.
- Keep flames and ignition sources away and note that a technical exhaust air system is required for explosion protection.
- Caution: Only suitable for the storage of hazardous substances. Contains chemicals, keep away from children.
