Safety Instructions:

- The safety storage cabinet is intended for indoor use only. Attention: Only use indoors.
- The cabinet must be properly locked to prevent unauthorised access. Ensure that the cabinet is always closed.
- Regular maintenance and inspection of the ventilation system for proper function and safety. Ensure adequate ventilation when storing flammable liquids.
- Follow packaging and storage instructions for toxic and aggressive chemicals and always consult the safety data sheets, as the product and its features may contain hazardous substances.
- Caution: Danger of chemical reactions between different stored substances. Pay close attention to the presence of substances hazardous to water.
- In the event of a leak or release, take immediate action.
