Safety Instructions:

- For indoor use only.
- Lock the hinged doors with a cylinder lock to prevent unauthorised access. Secure the contents with a cylinder lock.
- Install an integrated ventilation system and maintain it regularly to ensure explosion protection. Install the exhaust air connection correctly.
- Only load pull-out shelves up to the maximum load capacity of 30 kg.
- Carry out regular inspections of the cabinet, ventilation systems and seals to ensure safety.
- Store chemicals in the cabinet safely and in closed containers. Take appropriate safety precautions for hazardous substances.
- Protect the product from direct sunlight, moisture and heat.
- Only authorised and trained personnel should use the cabinet. Children should not have access.
- Product-specific safety information and instructions for use and operation must be provided in understandable language.
- In the event of any damage or defects, inform the manufacturer immediately and discontinue use.
- Keep chemicals away from heat sources and open flames.
- Only store authorised chemicals; chemicals may escape if used improperly.
- Wear personal protective equipment such as gloves and safety goggles during use. In case of contact with chemicals, rinse thoroughly and consult a doctor.
- Only use the product in accordance with the manufacturer's recommendations and the applicable regulations.
