Safety Instructions:

- The environmental cabinet is only suitable for indoor use and must not be used outdoors.
- Safely store flammable liquids of GHS categories 1-3 and substances hazardous to water of GHS categories 1-4 and observe the corresponding safety regulations.
- The cylinder lock on the hinged doors must always be locked to prevent unauthorised access. Regular inspection of the lock is recommended.
- Install the exhaust air connection in accordance with the applicable regulations and use technical exhaust air for regular air exchange. Observe the manufacturer's instructions.
- The integrated ventilation system must be serviced regularly to ensure safety.
- Prevent access by unauthorised persons.
- Carry out regular checks for leaks.
- In the event of ignition, evacuate immediately and provide fire-fighting equipment.
