Safety Instructions:

- Only suitable for the storage of chemical substances.
- The cabinet may only be used indoors.
- Wear suitable personal protective equipment such as gloves and safety goggles when handling chemicals.
- The cabinet has a lockable hinged door; make sure that this is always closed when the cabinet is not in use.
- The cabinet's ventilation system must function properly to avoid the risk of fire and explosion.
- When storing chemicals, check regularly for leaks.
- Observe the maximum load capacity of 25 kg per pull-out shelf.
- Follow the instructions in the operating instructions supplied for safe use.
- Only store aggressive liquids in accordance with the safety precautions provided.
- Do not bring into contact with food or drink.
- Check the cabinet regularly for damage and ensure that all safety devices are working.
