E-Mail: info@saebu.de

Please note the technical data of the products!

Article Numbers: 39104, 39061, 39057, 39053

Safety Instructions:

- Use a suitable and stable base for mounting the material container.
- To ensure the stability of the container, the maximum permissible standing load of the wooden floor of 500 kg/sqm must not be exceeded.
- The material container should be placed on a stable, level and firm surface to prevent it from tipping over.
- Heavy objects should be evenly distributed in the container to prevent them from tipping over.
- When unloading the container, a suitable crane or forklift must be used to prevent injuries.
- Ensure that the fleece coating on the underside of the roof is installed correctly and is not combined with continuous rooflights to avoid functional restrictions.
- Safety and installation instructions must be clearly legible and provided in understandable language.
- To ensure safety, all installation work must be carried out in accordance with the instructions.
