Safety Instructions:

- Beware of sharp edges on the construction and when handling.
- Ensure that the cabinet is secure and is used on a level surface to prevent it from falling over.
- Do not overload the cupboard to ensure stability. Observe the maximum load-bearing capacity of the shelves.
- The castors can pose a tripping hazard if they are not correctly adjusted; check regularly for damage.
- The cabinet must be installed by qualified personnel and used in a safe location.
- Caution: Cabinet may be unstable if not positioned correctly.
- Ensure secure fastening during installation. Check that all parts are present before use.
- Keep heavy tools stored at the bottom to ensure stability.
- Check the lock regularly to ensure security.
- Beware of crushing hazard when closing the hinged doors.
- Please do not pull the cabinet too tightly to avoid damage.
- Do not store any electronic devices improperly in the cabinet, even though the cabinet is not electrically operated.
- Do not use the cabinet as a ladder or for purposes other than storing tools and accessories.
- Due to the height of the cupboard, there is a risk of objects falling when reaching the upper shelves.
- Damage caused by improper use or overloading can lead to injuries.
- The drawer must be fully closed to prevent the cabinet from tipping over.
