Safety Instructions:

- Choking hazard due to small parts that can be produced by the appliance during operation.
- Risk of injury from moving parts of the cutting unit.
- Use only at a moderate noise level (approx. 70 dB) - suitable for office or residential environments.
- Activate the safety lock to prevent improper use.
- Please do not use the appliance in the presence of children, as there is a risk of suffocation from small parts.
- Pay attention to heat resistance and load: Use overload protection to protect the appliance from damage.
- Ensure that the cutting unit is correctly positioned on the collection container to work safely.
- Follow the instructions for correct emptying and use of the collection container.
