Safety Instructions:

- Place the cabinet on a stable, level surface to prevent it from tipping over.
- Only lock with the enclosed keys to prevent unauthorised access.
- Use a security cylinder lock and maintain it regularly to ensure access protection.
- Pay attention to sharp edges and corners during use to avoid injury.
- Avoid open flames, high temperatures and chemicals for damage and stability risks.
- Respect maximum load limits to avoid overloading and instability.
- Follow the assembly instructions exactly and fasten all parts correctly to ensure safe installation.
- Keep keys out of the reach of children to control safe access.
- Product complies with general safety requirements and should only be used for its intended purpose.
- Regularly check the operation of doors and locks for security and maintenance.
- Suitable for changing rooms, subject to safety precautions.
- Improper use can lead to damage or danger and should be avoided.
- Not suitable for use by children; safety instructions must be observed.
