Safety Instructions:

- The hinged boxes can break or be scratched if handled incorrectly, posing a risk of injury.
- The product is not suitable for use by children and contains small parts that pose a choking hazard; therefore not suitable for children under 3 years of age.
- The hinged boxes should not be overloaded to avoid structural damage; take care to distribute contents evenly to prevent tipping.
- The cabinet should be assembled and dismantled in accordance with the instructions in order to avoid stability risks, tipping over and the risk of injury.
- Check regularly that the cabinet is stable and on a level surface to avoid the risk of tripping or falling over.
- Avoid strong force and direct sunlight, as these can weaken the material and lead to discolouration.
- Keep the area around the cabinet dry to prevent rust from forming on the metal.
- Only use the product for its intended purpose in industry, workshops and similar environments.
- The temperature resistance of -20 °C to +80 °C should be observed in order to prevent material damage.
