Please note the technical data of the products!

Article Numbers: 39064, 39060, 39056

Safety Instructions:

- Place containers on level, firm and horizontal surfaces to prevent them from tipping over.
- Use suitable aids to unload the container in order to avoid injuries.
- Observe the maximum static load of 500 kg/sqm with a distributed load to avoid overloading and structural damage.
- Fleece coating on the underside of the roof binds condensation water; prevent water from accumulating and regular inspection recommended.
- Follow the installation instructions to prevent improper installation and possible injury.
- Exterior must comply with safety standards; beware of sharp edges.
- Place containers on stable, solid surfaces.
- Ensure safety when using a crane or forklift.
- Cannot be combined with continuous rooflights.
- Use protective equipment during assembly and handling.
