Safety Instructions:

- Ensure that the height of the table is set correctly to avoid injury. The height adjustment should only be carried out by one person. Ensure that the table is placed on a stable and level surface to prevent falls and tipping.
- Use the cable apertures properly to avoid tripping hazards. Ensure that cables are routed safely to prevent tripping hazards.
- The tabletop could pose a crushing hazard. Adjust the height adjustment with care to avoid crushing.
- The table is not suitable for children. The product must not be used by children without supervision. Keep small parts and packaging material out of the reach of children to avoid the risk of suffocation.
- Keep all installation instructions and safety instructions to hand.
- Ensure that the table is correctly assembled to prevent the risk of falling and injury. The stability of the table should be checked regularly, especially on uneven surfaces.
- Avoid sitting or standing on the table top to prevent it from falling over and potentially injuring yourself.
- Avoid overloading the table with heavy objects; the maximum load capacity is 60 kg. Do not exceed this limit to prevent damage and injury.
- Keep small parts such as screws and washers away from children.
- Only use the table in the intended area of use to avoid accidents.
- Regularly check for loose screws and connections to ensure safety.
- Do not use any products with sharp edges or wood splinters.
- Keep the table away from moisture and direct heat to prevent damage. Hot objects should not be placed directly on the tabletop.
- Avoid excessive loads of more than 60 kg.
