Safety Instructions:

- Ensure that the table is stable before use to avoid the risk of tipping.
- Set up out of the reach of children to avoid hazards due to improper use.
- Maximum load capacity: Do not exceed 80 kg dynamic and 80 kg static to ensure stability.
- Avoid placing loads heavier than 80 kg on the table top.
- Only operate the table on stable and level surfaces to prevent the risk of tipping.
- Ensure sufficient distance from other furniture when adjusting the height.
- To avoid injury when lifting or lowering, always use the control panel.
- Only use the electric height adjustment in accordance with the manufacturer's instructions to avoid injury or risk of electric shock.
- Children should not play unsupervised with electrical controls.
- Protect electrical connections from moisture to avoid electric shock.
- Lay cables safely and ensure that they do not become a tripping hazard.
- Keep hands and body parts away from the height adjustment mechanism to avoid crushing injuries.
- Avoid danger of suffocation from detachable parts, especially for children.
- Carry out regular function tests of the electrical height adjustment to ensure safety.
- Ensure that the table is securely mounted to avoid the risk of tipping.
