Safety Instructions:

- Ensure that the table is stable on an even surface to prevent it from tipping over or slipping.
- The maximum dynamic and static load capacity of the table is 120 kg. Do not exceed this limit to avoid safety risks and damage.
- Do not use the table if it is not properly assembled. Read the assembly instructions carefully and follow them.
- When using the electric height adjustment, ensure that there are no people or objects in the table's movement range to avoid injury.
- Children and vulnerable persons should be supervised when operating the electric height adjustment system. The table is not suitable for children under the age of 12 or 14.
- Regularly check the stability and function of the electrical components. Repair any damage immediately to avoid the risk of fire or electric shock.
- Keep the electrical connection dry and free of water to minimise the risk of electric shock.
- Electrical components must not be tampered with. Repairs may only be carried out by the manufacturer.
- Avoid using the table for purposes other than those for which it is intended.
- Before use, ensure that the table is stable and correctly assembled.
- When assembling and adjusting the table, make sure that no loose parts or tools are in the way.
- Regular maintenance and inspection of the electrical components are recommended.
