Safety Instructions:

- Risk of suffocation when handling lithium batteries if they are not properly packaged.
- Fire hazard due to damaged or leaking batteries in inadequately protected containers. Avoid storing damaged or leaking batteries together.
- Take care when filling the inlay bag with vermiculite or expanded glass granulate: make absolutely sure that no materials that are harmful to health are used. Use suitable buffer materials such as vermiculite or expanded glass granulate.
- Ensure that the inlay bag is handled in accordance with ADR transport regulations to fulfil legal and safety requirements.
- Observe the safety regulations for lithium batteries.
- Ensure adequate ventilation when the bag is used to store batteries.
- Only use the bag in the designated safety container to minimise risks.
- Keep the bag away from fire and extreme temperatures.
