Please note the technical data of the products!

Article Numbers: 463678, 463677, 463676

Safety Instructions:

- Ensure that the container is suitable for the intended materials and does not react chemically with them. If there is any uncertainty about material compatibility, information should be obtained from the manufacturer.
- Take care when handling hazardous substances; wear suitable protective equipment. Wear suitable personal protective equipment when filling or emptying the container with hazardous substances.
- Keep the area around the container clean to minimise the risk of falling and tipping over. Ensure that the container is stable and will not tip over.
- Observe the maximum filling volume of 600 litres.
- This container is not to be used for the transport of food unless it is expressly designed for this purpose.
- Only store hazardous substances in suitable containers.
- Regularly check for damage or leaks. Regularly check for leaks, especially when storing liquids.
- Protect from direct sunlight to avoid material changes.
- Delivery and use in accordance with the special conditions for polyethylene products.
- A sticker with a description of the product and crawling instructions should always be present.
