Safety Instructions:

- Ensure that the monitor arm is correctly and securely mounted on the table to avoid the risk of accidents and only use the components supplied in accordance with the instructions.
- Ensure that the monitor does not exceed the maximum load capacity of 12 kg; if in doubt, check the stability of the table clamp.
- Check the gas spring mechanism regularly for functionality to avoid sudden movements or crashes of the monitor.
- Follow the instructions for safe height adjustment and tilting of the arm to prevent injuries.
- Organise cable management in such a way that tripping hazards are avoided by keeping cables out of walkways.
- Inform consumers that installation must be carried out in accordance with the instructions to ensure the level of safety.
- Avoid choking hazards due to improper handling of small parts during assembly.
- When mounting, ensure that the table clamp is properly fastened to prevent the monitor arm from slipping and check the fastenings and joints regularly.
- Place the product out of the reach of children to minimise the risk of accidental injury.
