Safety Instructions:

- Do not exceed the maximum weight of the monitor (max. 12 kg per monitor) to avoid damage or injury.
- Ensure that the monitor arm is stable and correctly mounted to prevent it from toppling over, tipping over or falling down.
- When mounting, make sure the table clamps are stable and use them correctly to ensure secure fastening.
- Regularly check the stability and strength of the monitor arm, especially after adjustments.
- Ensure that all cables are laid neatly and do not create any tripping hazards.
- Avoid excessive tension on cables to prevent damage.
- Compliance with the VESA standards for the mounting screws to ensure the safety of the displays.
- Keep the moving parts of the monitor arm out of the reach of children during adjustment.
- Before adjusting the height or position, ensure that there are no persons or objects in the danger zone.
- Regularly inspect the table clamp and connecting elements to ensure that they are tight and secure.
- If you have any problems or questions, please contact the manufacturer.
