Safety Instructions:

- Max. load specifications must not be exceeded (for use up to 50 kg, note 70 kg).
- Avoid the risk of slipping: Mat should be used on non-slip, firm and level surfaces and cleaned regularly to prevent dirt accumulation and wetness.
- Avoid fire hazard: Do not use near open flames or extreme heat sources, although flame retardant.
- Mat is intended for indoor and suitable outdoor areas, but do not use in extreme temperatures or very wet conditions.
- Beware of choking hazard due to small parts, not suitable for unsupervised children.
- Resistant to oil and chemicals, but should be cleaned immediately if heavily soiled to avoid the risk of slipping.
- Do not exceed the maximum washing temperature of 70°C and drying at a maximum of 80°C in order to avoid material damage.
- Protect the mat from overheating in the dryer or strong direct sunlight to prevent damage to the material.
- Ensure that the mat is laid correctly to avoid the risk of tripping.
- Regularly check for signs of wear or damage to maintain slip resistance.
- Note material information, allergies possible.
- Do not use in industrial areas with heavy mechanical loads and vehicle traffic.
- Observe antistatic properties, no static discharges.
- Cleaning in industrial washing machines is permitted up to 70°C.
