Safety Instructions:

- Do not use the Euro Box near extreme temperatures above +100°C or below -20°C.
- The box is not suitable for storing solutions or substances that are known to damage polypropylene.
- Use only by adults or under adult supervision to ensure that children do not get into the boxes.
- Take care when using on conveyor lines and pay attention to the noise level and stability to avoid injuries and tipping over.
- Regularly inspect the boxes for cracks or damage to ensure safe use.
- Before accessing the product, ensure that it does not have any sharp edges to prevent cuts.
- Avoid contact with sharp objects to prevent damage to the box.
- Not suitable for food storage or direct contact with food unless special authorisation has been obtained.
- Can tip or fall over if stacked incorrectly or overloaded.
- If water drainage holes are installed, take extra care to prevent leakage.
- The product is without a lid and should not be used for the transport of loose, small or hazardous materials.
- For storage, the temperature limits of -20°C to +100°C should be adhered to in order to avoid deformation.
- The product is only suitable for commercial use and not for private use.
- Do not overload to prevent damage or tipping over.
- Keep the box away from high temperatures and direct sunlight to avoid material deformation.
- The box is not suitable for use in potentially explosive atmospheres.
- Check the condition of the box for cracks or damage before use.
- Take care when using outdoors, as extreme temperatures can affect the material resistance.
- Protect the product from mechanical damage.
- Not suitable for children without supervision, as the product may be attractive to children due to its shape and size.
- Only use the product for its intended purpose in order to avoid accidents.
- When storing or transporting heavy goods, ensure that the boxes are stacked stably to prevent injuries.
- Dispose of in accordance with local regulations for plastic waste.
