Article Numbers: 35969, 35968, 35967, 35890, 35889, 35888, 35198, 35197, 35196, 34067, 34066, 34065, 33929, 33928, 33927, 33802, 33801, 33800

Safety Instructions:

- Do not exceed the maximum shelf load of 500 kg per shelf.
- Do not exceed the maximum bay load of 2500 kg.
- Distribute loads evenly to prevent structural damage and tipping.
- Ensure that the shelving is stable and mounted on a level, solid surface.
- Carry out assembly in accordance with the manufacturer's instructions and ensure that the wire mesh shelves are properly locked.
- Check the shelf regularly for wear or damage and tighten connections if necessary.
- Only use the shelf for the intended storage and not as a climbing or sitting surface.
- Wear suitable protective equipment when assembling and handling the shelving.
- Do not use the shelf for highly flammable or hazardous substances.
- Ensure that chipboard or other storage surfaces for the small parts are secure and stable.
- Avoid sharp edges and observe precautionary measures against cutting and crushing hazards during use.
- Only install the shelf in dry rooms to prevent rust formation.
- Use the shelf with the intended fixings for wall or floor anchoring to ensure safety.
