Article Numbers: 451954, 451953, 451952, 451951

Safety Instructions:

- The gloves are not sterile; therefore not suitable for medical or invasive applications and intended for single use only.
- Do not use the gloves in applications where there is an increased risk to the product or in direct contact with sharp or pointed objects to avoid tearing or puncturing.
- The gloves must not be used for processing fatty or highly chemical substances unless they are expressly suitable for this purpose, and direct contact with food is only safe if the gloves are labelled accordingly.
- The use of gloves when working with chemicals or infectious materials is only recommended in accordance with the relevant safety guidelines.
- In the event of allergic reactions or skin symptoms, discontinue use immediately and consult a doctor. Check for allergies to nitrile before use.
- Store in a cool, dry place, away from direct sunlight. Suitable for food contact, but not suitable for surgical use or as a medical product.
- Gloves may slip in damp conditions, so care should be taken with wet surfaces. For external use only and single use is recommended.
