Article Numbers: 132981, 132979, 132976, 132974

Safety Instructions:

- Ensure that the shelf is properly assembled and stabilised and that it is mounted on a stable, level surface to prevent it from tipping over; the supports must be securely anchored in the frame.
- Observe maximum 244 kg per level and a total load capacity of 4,500 kg; do not exceed the maximum load of the upper level (400 kg for 800 mm deep).
- Regularly check the structural integrity and stability of the shelving and the locking pins for blocking the traverse for functionality; ensure that the locking pins are fitted correctly in accordance with the instructions.
- Use only for the intended goods and not in excess of the authorised load capacity; use only for non-flammable or explosive materials.
- Use padlocks to lock and secure access to prevent unauthorised access; these should be suitable for the intended purpose.
- Observe installation and safety instructions as well as applicable safety standards and norms; the manufacturer must ensure this.
- Controlled access to dangerous goods; read the installation instructions carefully before installation and use.
